

ISLAM AND THE CLASH OF CIVILIZATIONS

In the 21st century, the greatest threat to the existence of the United States and its allies in Europe does not come from Russia, China, or North Korea. It comes from Islam. Islam is not merely a religion. It is a complete civilization with its own ethics, metaphysics, theology, and political theory in opposition to every other civilization on Earth. The Taliban, al-Qaeda, Boko Haram, the Muslim Brotherhood, and ISIS are merely brand names with a common ideology — literal implementation of the laws of Sharia, and abolishment of every non-Islamic religion and political system in the world.

The ancient Civilizations of Egypt (Coptic), Iran (Zoroastrian), Afghanistan (Buddhist), Pakistan (Hindu), North Africa and Syria (Christian) have been replaced by Islamic imperialism. Are these nations, under Islamic rule, any better than when they were non-Islamic?

Now, in addition to India and Israel, the traditional adversaries of Islam, the United States, Europe, Russia, China, and Thailand are under constant attack by Islamic fundamentalism. Islamic imperialism is infinitely more dangerous than Nazi Germany (which lasted for only about 15 years) and Russian Communism (which lasted for just over 70 years). In fact, Islamic Jihad has been going on from the very inception of Islam, and its warrior prophet, 1,400 years ago.

There are only two choices left for the United States, Europe, and the citizens of the Free World — either to surrender to Islamic imperialism, or to defeat it utterly... But how?

Islam and the Clash of Civilizations is the very first book to explain, rationally and in detail, how to defeat Islamic imperialism decisively and permanently. Read it, and you will know how easily you — wherever you may live — can take the steps needed to rid the world of Islam's threat to peace, progress, and prosperity — without harming the vast majority of Muslim people who secretly want freedom as much as you do. This book embraces critical thought, empirical deconstruction, and scientific method in examining the threat of Islamic imperialism.

About the Author: Panini has been studying the growth of Islamic fundamentalism worldwide for over thirty years. He is a political philosopher, and an American citizen.
